

**GRUNDY COUNTY
MEMORIAL HOSPITAL**

A PARTNER OF ALLEN HOSPITAL

Dr. Stephen Solomon Podiatrist

I see that Dr. Stephen Solomon, Podiatrist, sees patients at GCMH. Can you tell me what a doctor of podiatry is?

Answer: A doctor of podiatry primarily sees patients with problems of the feet and ankles. Problems would include bunions, hammertoes, ingrown toenails, arthritis, and bone spurs, just to name a few. Keep in mind that foot pain is not normal and there may be a way to ease or even stop the pain. Good foot and leg care is even more important to people with certain problems such as diabetes and those with poor circulation. If you suffer from either of these conditions you should have your feet checked regularly.
